Professional Summary

Senior Full Stack Engineer with 6+ years of experience designing, developing, supporting, and optimizing enterprise-grade web and mobile applications using Angular, Node.js, NestJS, PostgreSQL, AWS, and TypeScript. Strong background in production support, troubleshooting critical incidents, root cause analysis, performance optimization, and cloud-native application development. Proven track record supporting mission-critical applications, developing scalable REST APIs and microservices, optimizing database performance, and improving system reliability in AWS environments. AWS Machine Learning Certified with practical experience working with cloud services, serverless architectures, CI/CD pipelines, monitoring, and application support.

English: Professional proficiency level

Professional Experience

Grainchain Inc — Senior Frontend Developer

January 2025 – April 2026

- Development of financial dashboards with Angular and Angular Material
 - State management with NgRx for scalable applications
 - Optimization of complex tables and data virtualization, using charts and dashboards.
 - Implementation of responsive interfaces, improving usability on mobile devices
 - Internationalization (i18n) management with ngx-translate
 - **Performance improvement through lazy loading and optimized change detection**
 - **Advanced use of Signals, as well as proficiency in RxJS**
-

Lumston — Frontend Developer

May 2023 – June 2025

- Mobile application development with Angular and Next.js for enterprise clients (Volaris, Scotiabank, Doña Tota, Golden Corral, Viva Aerobús)
- Implementation of scalable functionalities in production environments
- Web application development using React and Next.js (SSR, routing, and performance optimization)
- API integration and user experience improvement in critical workflows
- **Definition and monitoring of code quality metrics (technical debt, rework, maintainability)**
- **Integration of Stripe Payments for payment processing in fintech applications**

- Reduction of load times by approximately 30% through component optimization and state management
 - **Continuous feature delivery, reducing development time by approximately 20%**
-

UffPay —Frontend (Fintech) - Freelancer

January 2023 – July 2024

- Fintech app development in React Native for payments, transfers, and top-ups
 - Integration with Neonet and Cybersource for payment processing
 - Backend development with AdonisJS
 - **Reduction of payment flow errors by approximately 25% through validations and UX improvements**
 - **Optimization of API response times by approximately 30%**
-

Monkey Cave — Senior Frontend Developer / Technical Leader

January 2020 – January 2023

- Technical leadership in frontend projects
 - Definition of architecture and development standards
 - **Improved team efficiency by ~25% through best practices and sprint organization**
 - **Implementation of best practices (code reviews, testing, sprint organization)**
-

Skills

Frontend

Angular (14–20), React, Next.js, React Native, TypeScript, JavaScript (ES6+), HTML5, RxJS, Signals, NgRx, Redux

UI & Styling

CSS3, SCSS, TailwindCSS, Bootstrap, Angular Material, Material UI, Responsive Design

Backend

Node.js, NestJS, Express.js, AdonisJS, REST APIs, Microservices Architecture, Event-Driven Architecture

Databases

PostgreSQL, MongoDB, SQL Optimization, Query Performance Tuning, Database Design, Indexing, Transactions

Cloud & AWS

AWS Lambda, API Gateway, EC2, S3, CloudFront, Cognito, IAM, CloudWatch, CodeBuild, CodePipeline, EventBridge, Serverless Architectures

Data & Analytics

AWS Glue, AWS Athena, ETL Pipelines, Data Processing Workflows, Data Lakes, AWS Machine Learning Fundamentals

DevOps & Infrastructure

Docker, CI/CD Pipelines, GitHub Actions, AWS CodePipeline, Infrastructure Automation, Monitoring & Logging

Production Support

L3/L4 Support, Incident Management, Root Cause Analysis (RCA), Application Monitoring, Performance Optimization, Troubleshooting, Reliability Engineering

Testing & Quality

Jest, Jasmine, Karma, TDD, Unit Testing, E2E Testing, SonarQube, ESLint, Code Reviews

Architecture & Methodologies

Clean Architecture, MVVM, SOLID Principles, Agile, Scrum, Design Patterns

Education

Associate's Degree in Multiplatform Software Development

Technological University of Central Veracruz

Graduated in 2022

Certifications and Achievements

- AWS Machine Learning Certification
- Strip Developer Certification – 2024
- CCNA: Switching and Routing – 2020
- Third Place – Programming Olympiad – 2017
